

Food and Lifecycle

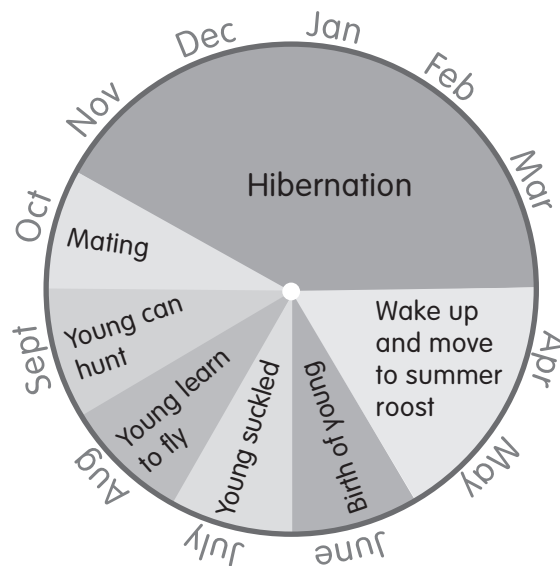

Bats are carnivores. They fly at night in summer feeding on aerial insects. Tick off which of the following are eaten by bats:

Woodlice
 Worms
 Midges
 Mayflies
 Mice

Mosquitoes
 Moths
 Slugs
 Bees
 Daddy-Longlegs

Here is a drawing of the life cycle of a bat.

TO DO:

Write a paragraph about a year in the life of a bat using this drawing to make sure that the points you make are accurate.
